## HIGH CARBON MIX

Years of cultivation has eroded the natural organic matter in our soils. This High Carbon cover crop mix is designed to leave more carbon behind after the top growth has been incorporated and digested by the soil microbes than mixes with higher percentages of legumes.

### High Carbon MIX QUICK LOOK

SEED RATE	100-130 lbs per acre
PLANTING DEPTH	3/4-1"
GROW HEIGHT	24-60 inches
PLANTING TIME	Sept-Nov 30
BAG SIZES	1-50lbs
