---

**MIX DESCRIPTION: Farmstead Pasture Patch**

**Coverage: 5lbs of seed covers 8,500 Square Ft**

**Bucket Size: 2 gal/ 5lb Seed.**

Item Description	Quantity	%
Orchardgrass		30
Riley Intermediate Rye		35
Tetraploid Annual Rye		15
Lofa Festulolium		20

**Planting Instructions:**

**Soil Preparation:**

Ensure the planting area is free from weeds, debris, and any existing vegetation. Loosen the top 2-3 Inches of soil using a rake to create a smooth and even surface.

**Seeding:**

Use a handheld spreader or scatter the seeds by hand to distribute the seed mix evenly over the patches.

**Soil Coverage:**

Lightly rake the soil to cover the seeds slightly. Aim to cover them with about 1/8"-1/4" of soil. An even covering helps with germination and protects the seeds from wind and birds.

**Watering:**

Water the newly seeded patches thoroughly immediately after planting; the soil should be moist but not soaked. Keep the soil consistently moist until seeds germinate, this may require daily watering depending on your weather conditions, especially if it's hot and dry.

**Grazing:**

Begin to graze when grass is 8-12" tall. Grazing below 3-4" may result in termination and need reseeding.
