**Planting Instructions**

Prepare the soil:

Clear the area of any existing weeds, grass, debris

Loosen up the soil to a depth of 1-2" using a rake, hoe, or garden fork.

Broadcasting:

Use a handheld spreader or scatter the seeds by hand, ensuring even coverage.

Seed Coverage:

Lightly rake the soil after broadcasting to cover the seeds. The goal is to have the seeds covered by no more than 1/8-1/4" of soil.

Watering:

Water the planted area immediately after sowing to moisten the soil.

Avoid over watering

Water as necessary, especially during dry periods.
